Delivering Positive Energy

On track to create maximum sustainable value from Indonesian coal

Each time we send Envirocoal, the cleanest thermal coal available on the export market, on time and as ordered to our loyal customers, we deliver positive energy. In the passionate work of each of our employees, in the way we conduct ourselves, in the impact we have on those around us and in the contributions we make to society, we deliver positive energy.

As we turn a non-renewable resource into a renewable one, as we create maximum sustainable value from Indonesian coal, we deliver positive energy. It is time to see coal for what it really is: positive energy. In 2013, we are on track to deliver 50 to 53 million tonnes and generate an EBITDA of US\$850 million to US\$1 billion. In this exciting time of growth in Indonesia and the Asia-Pacific region, it is a great honor to be able to make such a positive impact.

At Adaro, we are different - in what we produce and also how we behave. We are doing more than just building a great coal and energy company, we are **Delivering Positive Energy.**
